W. F. JONES, Treasurer.

We have this day examined the foregoing accounts and find them correct and properly vouched.

Jan. 31, 1918.

GEO. F. HATHAWAY,
H. ARTHUR ROBBINS,
ALVIN BROWN,

Selectmen of Norway.

Report of the Sealer of Weights and Measures

TO THE SELECTMEN OF THE TOWN OF NORWAY:

I submit my report as Sealer of Weights and Measures for the Town of Norway from January 1, 1917 to January 1, 1918.

		Tested	Condemned
Number	scales.....	78	1
"	Oil and molasses pumps.....	10	0
"	Dry measures.....	10	0
"	Liquid measures.....	18	0

Respectfully submitted,

HARRY E. LOVEJOY, Sealer of Weights and Measures.

Report of Main Street Improvement Committee

Norway, Maine, January 11, 1918.

The Committee on Main Street improvement submit the following report:

Am't. Appropriated by Town March 1916.....	\$20,000 00
" " " " " 1917.....	2,500 00
Premium on Bonds sold.....	45 00
Received from the Oxford Elec. Co.....	2,000 00
Total Am't. available.....	\$24,545 00
Am't. expended to date.....	21,112 56
Balance unexpended	\$3,432 44

There has been a total of 1,728 sq. yards of pavement condemned by the engineer that as yet we have been unable to agree upon a price for. Therefore the committee is unable to give a final report.

Respectfully submitted,

H. B. FOSTER,
W. F. JONES,
H. F. ANDREWS.

Report of the Superintendent of Schools

TO THE BOARD OF EDUCATION AND CITIZENS OF THE TOWN OF NORWAY:

I herewith submit my seventh annual report for your consideration.

Every business enterprise has been more and more surrounded during the past year with difficulties peculiar to the unusual world conditions. These conditions have begun to cast their spell over the school organization. It has been felt the most in shortage of help, increase in wages, and prices of commodities. Some school supplies have advanced as much as 300 per cent. Yet there is no one who would care to advise dropping the standard of our educational organization, and at the same time claim to be a true patriot. England and France made the mistake, at the beginning of the war, of cutting down educational costs only to see a decline in the moral fiber of every community and in national ideals. Last year England raised more for education than for any year in the nation's history. The rapidity with which our soldiers are trained is due in a large measure to the training of the Public Schools.

During the past year I have been greatly helped by a loyal and hard working corps of teachers. Their cooperation in all their work has been extraordinary. I have placed extra burdens upon them, which they have cheerfully accepted. Consequently, we have been able to accomplish many things for the betterment of the educational structure.

It will be remembered that in my reports of preceding years I have urged the necessity of a new high school building. As an alternative relief measure it was voted by the school board last August, upon my recommendation, to do away with the ninth grade.

On taking over the former eighth grade room for high school work, due to the increase in the high school enrollment, it was necessary to crowd one grade out of the building. So last year the third grade was housed in the dining-room of the Congregational church. It was impossible to obtain an adequate room in the village for another year. Upon putting the third grade into the building we were confronted with accommodating seven grades in six rooms. There are very few schools which retain the ninth grade. There are many points favoring a sub-primary or kindergarten, and many against a ninth grade.

Many places group six grades for elementary work. The seventh and eighth grades and first year of high school are grouped under the necessary teachers of special subjects as in the high school which is called a Junior High School. This leaves three years' work in the Senior High School. We have not made such a grouping because there is not room for it. We have, however, grouped the seventh and eighth grades for departmental teaching. This means that three teachers teach two subjects each in two grades. This arrangement makes it possible for each of the teachers to choose her two favorite subjects, to which she can give all her enthusiasm and time. This has raised the tone of the work and secured better results among the individual pupils.

Each of the above grades has been divided into two divisions or groups, those doing good work and those not doing quite as well. In many cases the reason why some pupils did better work and received better rank than others was that some understood better than others how to study, and the poorest work was not always done by the dullest pupils. Our use of the Courtis Arithmetic Tests had helped us to confirm this decision. By having two groups, those needing help in learning how to study could get it. With two groups, freedom in promoting from one group to the next was made easy. I have emphasized to my teachers the importance of properly assigning lessons. In each assignment emphasis is laid on what is required, and any necessary hints as to solutions are given. This eliminates confusion in the pupil's mind when preparing the lesson. It also assists in establishing correct habits of study. It assists the teacher in holding pupils to an attainable standard. I have encouraged my teachers to believe that the value of the recitation is not so much in discovering what the pupil knows as is the value of clearing up difficulties and establishing new associations that lead on to a desire for further knowledge on the subject.

By the new grouping in these grades each pupil is given his fullest opportunity for advancement. Since the retarded division in each grade is about half as large as the other section, each pupil gets twice the number of times to recite, and, consequently, twice the attention he otherwise would receive. They are, at the same time, in each case, doing work in the text about three weeks behind the advanced division. They gain much valuable information from hearing the advanced division recite. They are not required to do this but do it from natural tendencies. Many supposedly dull pupils have developed surprising aptness, due to gained confidence and application to their deficiencies. The bright pupils no longer waste their time for needless explanation

for or from retarded pupils. Promotions from one group to another or from one grade to the next are made easier than formerly as the steps are smaller.

We are now attempting to do in eight years what we formerly did in nine. This leaves one weak spot in the grade work. There are many parents in the village who insist upon sending their children to school as soon as they are five or even before. With an eight-grade system this gets a child into high school at about 13 years. Although a child should not be promoted with a view to his age, but by his ability, yet there are few who can take the best advantage of their high school work at 13 years of age.

Beginning with the fall term a new system in reading was adopted for all the schools in the two towns. "The Progressive Road to Reading" had been tried out at the Middle Primary for two years with gratifying results sufficient to warrant its adoption.

In the new method, the learning of the names of the letters in the alphabet is omitted. (The names and the order of the letters in the alphabet is learned in the second and third grades.) There is no primer, and the learning of meaningless words is dispensed with.

At the end of the first year the children have read about four books. They have acquired a vocabulary of 220 words which they can recognize upon sight. The method previously used taught about 80 words the first year. Natural expression is developed, which the other method prevented. Through an ingenious method of grouping words into families, natural ability to spell is developed. The best feature of the method is that children develop a love for reading, which is perhaps the best part of it all. Most of my teachers eagerly follow the directions in the Method. They realize that there is a difference between teaching a method in reading and hearing the children's reading lesson.

STANDARD SCALES

Prominent educators have evolved what is known as standard scales for measuring the ability of children in different subjects. These scales are perfected to such an extent that the ability of a child can be measured much the same as cloth can be measured by the yardstick.

Probably the most famous and satisfactory of these tests, both from the standpoint of the teacher and pupil, is known as the Courtis Tests in Arithmetic. These were worked out in the Detroit, Michigan, schools.

As an aid in measuring the work in Arithmetic the Courtis Tests have been used in the seventh and eighth grades during this year. These tests furnish an excellent drill in the four fundamental processes and have been used as such daily. As there are a definite number of examples to be worked in a time limit of three minutes, the drills are useful in developing speed as well as accuracy.

In the following report each child's per cent. is computed, not on the number of problems he tried, but upon the entire number in the test. This tabulated report shows the standing of a class in the test given in September, also the standing of the same pupils in a test given the first of January.

Grade VIII.

Number ranked at	Sept.	Jan.
20 to 30 per cent.	1	0
30 to 40 per cent.	0	0
40 to 50 per cent.	0	0
50 to 60 per cent.	7	1
60 to 70 per cent.	8	3
70 to 80 per cent.	7	6
80 to 90 per cent.	4	5
90 to 99 per cent.	8	7
100 per cent.	0	13
	<hr/>	<hr/>
Total number pupils	35	35

Similar results were obtained in the seventh grade.

As a means of comparing the efficiency of Arithmetic classes of to-day with those of former times the Springfield tests have been given in many cities.

A few years ago a set of examination questions with papers and their markings, which were given in the Springfield, Mass. schools in 1846, were discovered. The examination was given to the ninth-grade pupils, and the class in 1846 averaged 29.4 per cent. The 1905 Springfield class averaged 65.5 per cent. In Frankfort, Indiana, the average was 62.2 per cent. In Albia, Iowa, the class averaged 74.5, which was the highest per cent. ever attained.

This test was tried in the school here during the past year, and the class averaged 67.1 per cent., this being second among the classes on record.

Other standard tests have been used by me in the grades. I have supplied each teacher with the standard writing scales. Parents in the village will notice that instead of the customary 1, 2 or 3 on the rank card for writing, of late the teachers have used numbers from

6 to 18. The higher the number the better the writing. I have begun to use these scales, for they give a visible incentive for the child to write better and furnish the parent and school officials with figures that we can better understand.

SCHOOL ENROLLMENT.

As an indication of the growth of the town since 1912, I have compiled the following table, which shows the increase in school enrollment

Pupils in	1912	1916	1917
High school	102	107	144
IX Grade	23	35	
VIII "	24	41	38
VII "	27	34	42
VI "	27	32	33
V "	33	36	36
IV "	38	37	43
III "	41	31	41
Primaries	78	86	102
Totals	393	439	475
Norway Lake	24	18	13
Center	15	11	20
Swifts	18	14	16
Chapel	13	11	11
Crockett Ridge	8	23	27
Pierce			8
Holt	8	9	12
Nobles	12	9	
Sodom		15	10
Millettville	5	3	
Pikes Hill	11		
Totals for Rural	119	113	117
Totals for Town	512	552	592

It will be noted that there were 82 more pupils enrolled in 1917 than in 1912. This is an increase of 20.8 per cent. There were two more in the Rural Schools in 1912 than in 1917. This difference is merely apparent and not real, as the Pikes Hill scholars and part of those at the Lake now come to the village. Consequently, this shows an increase of about 21 in the rural school enrollment. (Pikes Hill 11 and Lake 12 less 2 gives 21).

SCHOOL CENSUS.

In 1912 there were in town 753 persons between the ages of 5 and 21 years. In 1917 there were 831. The return from the state this year for Common School purposes (\$5,312.61) amounts to \$6.39 per name. By means of the card system which I now have, the census list sent to the state each year is nearly absolutely correct. It will be seen that the omission of each name costs the town \$6.39, so it is highly important to have the list correct.

CONSOLIDATION vs. THE SMALL SCHOOL

The question has sometimes arisen as to the advisability of selling unused rural school houses. I have always been opposed to such a proceeding. The folly of such a proceeding is best explained by reference to the Sodom school. At the beginning of the fall term, 1913, there was not a child of school age in the district. At the beginning of the spring term, 1914, there were 11 pupils enrolled. It is not known when we shall need to open a school or close it in any locality. If the building is available it is not much trouble or expense to begin the school, provided the legal number of eight are to attend. If a school falls below the average attendance of eight it is automatically closed by law. To maintain a school of less than eight requires a special vote of the town.

It is an easy matter to compute the relative expense of transporting a few pupils or running a school. We have the figures on the fall terms of the Nobles Corner school for the past three years.

FALL TERM	TOTAL COST	AGENTS TO WHOM PAID
1915	*\$117.00	Taught by Marion C. Noble.
1916	60.00	Transported by W. A. Hersey.
1917	81.25	Transported by C. A. Haskell.
	*Includes janitor wages and fuel.	

The seven pupils who would naturally attend the Noble's Corner school have been transported to the Swift's Corner school for the year, which school when combined with the twelve pupils at Swift's Corner makes a sizeable school. The school has been ably directed and taught for the year by Miss Cora I. Wentworth, of Denmark, Maine. Miss Wentworth came to us well recommended and has made a place for herself in the community and in the hearts of her pupils. She brought to the school some good ideas from other school systems, and adopted whatever good ideas she has found here. It has been suggested that she be given an assistant at the school. Such an ar-

rangement does not work well. Good direction of the work at hand will secure better results. There are as many grades and more pupils at the Crockett Ridge school.

Early in the fall Miss Florence M. Hale, State Agent for Rural Schools, visited all the rural schools in this school district, except two, those at Sodom and Temple Hill. Lack of time in the school day prevented visits to these two schools. She gave an encouraging report on most of the schools. If space permitted I would like to include in this report an outline of the points upon which the schools were ranked. I have the outline at my office and should anyone wish to see it I shall be pleased to supply them with it.

Soon after this tour of inspection by Miss Hale it was decided by her to give some of her time and attention to organizing a model rural school somewhere in the district. For her convenience in reaching the school on her frequent visits she has decided to give her attention to the Crockett Ridge school. As she has said, the building is no more than the average rural school building. She considers this in its favor since observers sent to see the work cannot say that the building is so much better than their own that they cannot hope to do so much. Miss Hale has already given some suggestions for re-organizing the school and they have been put into effect. Miss Holgate, who has taught the school for the past three years, has already developed a wonderfully co-operative spirit among the pupils and parents. This has largely been brought about by her persistent energy and enthusiasm.

It is planned to make this school the nucleus from which to organize similar schools throughout the district. It is planned to have the school in session on Saturdays instead of Mondays so that opportunity to visit the school will be given to all. Miss Hale plans to send educators from away to see the school as soon as it is sufficiently organized. In fact she informs me that she knows of no rural school in this state, New Hampshire or Vermont, where she has visited extensively, where there is a better attitude of pupils, intent and purpose of teacher than in this school. She spoke highly of two other schools in the district.

In 1912, when I took charge of the schools, alternate terms of school were being held at Pierce and Chapel due to the small number of pupils. As the attendance at Chapel during the fall term was about 5 pupils per day, it seemed best to transport them to Pierce where the larger number of pupils were. As W. F. Durell was already transporting pupils to the Pierce school, it was an easy matter to make arrangements for an extension of his work to include the Chapel.

pupils. Due to the unusually cold weather and unusual amount of snow, the work has been somewhat difficult. It has been no more difficult, however, than other transportation routes and other problems of getting around, naturally arising from this unusual winter. Another difficulty causing the consolidation of the two schools was the scarcity of capable teachers.

I desire to say now and here that whenever parents and teachers at any rural school desire to make special arrangements for opening and closing schools, due to any unusual or special reasons or causes, I shall be pleased to grant the same in the interests of a majority so long as we have 34 weeks of school between September and June. This will make it possible to postpone a rural school during such unusual weeks as that of December 31st just passed.

Even if it is impossible for transportation teams to carry pupils for a week of severe weather, I believe that 30 weeks' work under a superior teacher is of far more value to children than 34 weeks' work under an inefficient teacher.

There are neighborhoods where teachers' best efforts are appreciated more than in others. It is a comparatively easy matter to get and retain good teachers in such neighborhoods. In such places the good work of the school is magnified instead of its minutest faults. Faults are sure to develop where anything of consequence is done. My teachers and I myself prefer some criticism to none. That of a cooperative type which helps to build and reconstruct and not merely to tear down is preferable.

REPAIRS.

It will be necessary to shingle the Academy building during the next year. As the school room at Crockett Ridge is very crowded, I have deemed it wise to ask for sufficient funds to build a room onto the school room to be used for the cooking apparatus used in connection with the hot lunch. As the toilet facilities at the Center are exceedingly poor, I am hoping to be able to install chemical closets there. This type of closet has been tested out for the past two years in Waterford and found highly satisfactory. It will be necessary each year to include something for painting the school houses throughout town until all have been painted. The Sodom school room is in very bad condition. It must have a new floor, ceiling, jacketed stove, new doors, more blackboards, new window frames, and a rearrangement of the windows.

TRUANCY.

The indifference to having children attend school regularly in town must be changed. The state laws concerning the school attendance of children between the ages of 7 and 15 years are very plain and exacting. If a parent cannot provide clothes, the town must do so; if the child is sick, a health certificate must be presented to excuse the absence or other equally satisfactory evidence presented.

In the state in 1915, there were 1764 persons, and in 1916 there were 1962 persons of compulsory school age not attending school regularly. The last Maine School Report (it being for 1916) says that it is "a distinctly unfavorable situation when nearly 2000 children whom the law specifically includes in its compulsory attendance provisions are allowed to remain out of school or attend more or less regularly. Any influence which can be brought to bear to bring about a more strict adherence to the provisions of this statute through exercise of the law or by creating a community sentiment for cooperation in the matter, should be welcomed as contributing to the general welfare of schools throughout the state." I desire that my teachers investigate the reasons for the absent and tardy marks on their registers and eliminate them to a minimum. Any assistance that the town officials, truant officer, court, or I myself can give are at their command.

The provisions of the Compulsory Attendance laws are as follows: "Every child between the seventh and fifteenth anniversaries of his birth shall attend some public day school during the time such school is in session, and an absence therefrom of one-half day or more shall be deemed a violation of this requirement. All persons having children under their control shall cause them to attend school as provided in this section, and for every neglect of such duty shall be punished by a fine not exceeding twenty-five dollars or shall be imprisoned not exceeding thirty days.

"If a child without sufficient excuse, shall be habitually and wilfully absent from school or shall fail without such excuse to attend school for five day sessions or for ten half-day sessions within any period of six months, he shall be deemed an habitual truant.

"Any person having control of a child, who is an habitual truant, as defined in the foregoing section, and being in any way responsible for such child when he is absent, shall be punished by a fine not exceeding twenty dollars or shall be imprisoned not exceeding thirty days.

"On complaint of the truant officer an habitual truant, if a boy, may be committed to the State School for Boys, or if a girl, to the State Industrial School for Girls."

COMMERCIAL COURSE

Previous to the spring term of 1914 the only commercial work given in the high school was an elementary course in bookkeeping. This course had been given by the principal, P. E. Hathaway.

Although I had recommended a complete commercial course to the School Board since coming here, yet no definite action in the matter had been taken until at the close of the winter term (March 27, 1914). This was after town meeting and no funds had been voted for the purpose. We had a balance in the high school account. I obtained permission from the School Board at that time to organize such a course provided it should cost the town only the salary of the teacher for the spring term. This term was to be used as a basis for judging the usefulness of the course to the school and to the town. It was to remain or not, entirely upon its own merits.

A college graduate with teaching experience and training in commercial work at Gray's Business College was employed to direct the course. With what success Miss Knight has organized and directed the work of this department is evident from its present standing. Typewriters for use during that spring term were loaned from different companies without cost to the town, not even express charges. The next fall five machines were purchased. The enrollment in the course vindicated its continuance. A majority of the tuition pupils are now taking the course. The town report of that year (1914) shows the return from tuition to be \$360.00, that being for twelve pupils. Last year we had a return of \$692.00, there being 23 tuition pupils in the school last year.

The required subjects presented in this course at present are as follows:

First Year	Periods per week.
English	5
Algebra	5
Commercial Arithmetic	5
Spelling	3
Second Year	
English	5
Advanced Algebra	5
Bookkeeping	10
Commercial Law First $\frac{1}{2}$ year	5
Civil Government last $\frac{1}{2}$ year	5
or Shorthand last $\frac{1}{2}$ year	5

Third Year	Periods per week.
Business English	5
Shorthand	5
Typewriting	10
Geometry	5
Fourth Year	
Business English	5
Shorthand	5
Typewriting	10
Bookkeeping	10

No class has as yet had the advantages of the full four years' course; yet, those who have graduated after two and three years' preparation, have met with gratifying success as the following list will testify.

Class 1916

Marion Bradbury—Office of Atherton Furniture Co. (several months previous to graduation and until August, 1916). Office of Carroll, Jellerson Shoe Co. (since August, 1916).

Beatrice Gammon—Office of Carroll, Jellerson Shoe Co. (since graduation).

Alice Tucker—Office of Carroll, Jellerson Shoe Co. (July and August, 1916).

Doris Shepard—Office of Dingley & Foss, Auburn (winter of 1916-1917). Office of Walter E. Luck & Son (summer of 1917). Office of Dingley & Foss, Auburn (winter of 1917-1918).

Dorothy Truman—Advertiser Office, operator of linotype (since July, 1916).

Francis Hall—Office of Carroll, Jellerson Shoe Co. (June and July 1916). Office of Swift Co., Lewiston, (since July, 1916).

Class 1917.

Ruth Smith—Norway National Bank (July-Sept., 1917). Office of Walter Gray, S. Paris (since Sept., 1917).

Frances Bartlett—Office of Atherton Furniture Co. (July-August, 1916). Office of James Wright, S. Paris (since July, 1917).

Bessie Pottle—Office of Novelty Turning Co. (since graduation and several months previous to graduation).

Florence Russell—Cashier, Babcock's Drug Store Lewiston, (since graduation until December). Temporary position with New England Telephone Co., Lewiston.

Raymond Evers—Office of Walter Tubbs Snowshoe Factory (since graduation until called to U. S. service and several months previous to graduation).

Evelyn Chandler—Office of General Electric Co., Schenectady, N. Y. (since October, 1917).

Postgraduates Who Have Taken Parts of the Course.

Marion Smith (1914-1915) Office of Norway Shoe Co. (since Jan., 1917).

Eula Bicknell (1914-1915) Office of S. W. Goodwin (May, 1915 to Jan., 1916). Office of Norway Advertiser (since Sept., 1916).

There are at present about 140 pupils in the high school. The main assembly room seats 104 pupils. Consequently, it has been necessary to seat the sophomore class this year in the former eighth-grade room.

We are to graduate about 20 pupils this year. You will note by the tabular statement that there are 38 pupils in the present eighth grade. Each year there are about a dozen pupils who come to the high school from outside the village and tuition pupils who come from other towns. This will make the enrollment of our school next year about 170 pupils.

It will be necessary during the coming summer to enlarge the laboratory recitation room. This seems to be an imperative need that must be met. If we are eventually to have a battery of 6 cast-iron boilers for heating the present building as well as the gymnasium, as has been recommended, it would be easier for the town to install about two each year for the next three years, thereby distributing the expense. The basement of the gymnasium is excavated and nearly ready for such an installation.

In submitting the foregoing I have desired to give a brief survey of the crucial factors that are at work toward moulding an effective and growing school organization. I believe that our school system is keeping abreast the times and training citizens as effectively as any in the state. I am grateful for the generous financial, moral, and practical support that is granted the system by a loyal school board and an enthusiastic and interested citizenship.

Respectfully submitted,

TRUE C. MORRILL, Superintendent.

HIGH SCHOOL REPORT

TO THE SCHOOL OFFICIALS AND CITIZENS:

At the request of the superintendent I submit for your consideration my annual report as Principal of Norway High School.

Last June, a class of twenty-four (24) was graduated, fifteen girls and nine boys, receiving diplomas from the following courses: English, 11; College, 9; Commercial, 4.

A glance at the alumni notes as taken from the Caduceus shows what the advantages of a high school education have meant to these young people. Some are carrying on the work at home, others have entered the service of the U. S., several are continuing their training in colleges and other educational institutions, and the rest have excellent positions in the lines of work for which they are prepared.

1917

Frances T. Bartlett, office of James Wright, South Paris.

Adna S. Buck, Norway.

Evelyn A. Chandler, office of the General Electric, Co. Schenectady, N. Y.

Raymond H. Evers, United States Service.

Mary L. Gammon, teacher, Norway Lake.

Leslie E. Gibson, Bowdoin, 1921.

Paul F. Hosmer, United States Service.

Emugene I. Hunt, teacher, North Waterford.

Katherine H. Jones, Bates, 1921.

Willard R. Lebroke, Norway.

M. Virginia Mixer, teacher, Norway.

Mildred E. Noyes, Tilton Seminary, Tilton, N. H.

Hugh Pendexter, Jr., Bowdoin, 1921.

Esther P. Pike, Pratt's Institute, Brooklyn, N. Y.

Bessie G. Pottle, office of Novelty Turning Co., Norway.

Florence E. Russell, New England Telephone Co., Lewiston.

Bertha Sessions, Express Office, Norway.

Louise U. Sheldon, U. of M., Orono.

Ruth Smith, office of Walter Gray, South Paris.

Leona M. Sloan, Bates, 1921.

Stephen E. Spofford, General Electric Co., Lynn, Mass.

June Tracy, teacher, Greenwood.

Wesley E. Tucker, Norway.

A record, without exception, of which the parents and citizens may be proud.

School opened Sept. 10, 1917, with an attendance of 144. The following table shows the growth of the school for the past four years.

No. in attendance four years ago.....	100
No. in attendance three years ago.....	108
No. in attendance two years ago.....	103
No. in attendance one year ago.....	120
No. in attendance now.....	144

The present enrollment consists of 76 girls and 68 boys.

The entering class, numbering 61, has taxed the seating capacity of the school to the limit. The attendance for next year will show about the same increase, so that the probable enrollment will be about 175. With but 152 seats available in two rooms the seating problem will be puzzling.

The increase in attendance has been very gratifying, for it is due to other causes than increase in population.

Still more gratifying is the fact that pupils are remaining in school, out of an enrollment of 144 at the beginning of the school year, we have lost but five, four (4) from the freshman class, and from the three upper classes combined, only one.

TEACHERS

There has been a few changes in the teaching force since my last annual report.

In the English Department Miss Marguerite Lougee succeeds Miss Florence Rideout, who was elected as head of the Eng. Dept. in Coney High School, and Miss Mary Dresser is giving part of her time from grade work as instructor in Freshman mathematics. Because of the rapid increase in numbers and the consequent necessity of the division of classes, I believe that we have now reached a point where the addition of at least one more permanent teacher to the high school force is necessary, if the standard of efficiency is maintained. The organization is now about as close as it can be made, and the teachers are, in many cases already heavily burdened with work.

REVIEW OF THE PAST YEAR

Several changes in the order of presentation of different subjects have been made, to meet the requirements of larger classes.

Great interest has been shown in the Teachers' Training classes. All those graduating from that course were at once placed in rural schools of Norway and other towns and are carrying on the work successfully. All who contemplate teaching are urged to take this

course as a preliminary to further and more extensive work in our State Normal Schools.

In connection with the work in Civil Government, lessons in Community and National Life have been introduced. These lessons were prepared by the Bureau of Education in co-operation with the U. S. Food Administration and have added very much to the interest in the course. Under the direction of the teacher the members of the class are making a careful study of the history, industries, institutions and problems of our own town, and more briefly of the country, state and nation.

The State Educational Department has been advocating such work as a fitting preparation for intelligent citizenship, and I feel sure that pleasing results will be obtained.

The work on the gymnasium, as called for under the contract, is nearly completed and the building will be ready for occupancy this spring, at which time a carefully arranged plan for the physical development of the pupils will be put in force.

A large service flag with forty-one stars has been purchased by the school and now hangs in front of the school building.

The work accomplished in Music, Debating, and in the various departments is briefly reviewed in the reports of the different instructors.

REPORT OF SCIENCE AND MATHEMATIC DEPARTMENTS

On account of students being unable to obtain sufficient knowledge of algebra in one year and a half to fit themselves for college mathematics, we are now giving a course in the sophomore year. This makes algebra compulsory for two consecutive years, and advance algebra in the Senior year for those who are preparing for college. This will enable the students to master college mathematics without difficulty.

The enrollment in the Science Department has more than doubled in the past two years. Last year there were three students in the chemistry class this year eleven, and twenty have signed up for the course next year.

General Science enrollment in 1916-17 was thirty, this year forty-two. This course is an important course in all secondary schools. Its aim is to give the student a general working knowledge of all branches of science. This year a greater stress is placed upon note books than before. It trains the student to be exact, neat, and to do his work systematically.

The physics class has three recitations and two laboratory periods a week. The addition of new apparatus has made the course more interesting, and the students have been able to put the theories learned in practice.

Forty have taken the Physical Geography course. The large number in the class made it impossible to carry out the work just as desired, but we have done field and note book work along with the text.

Respectfully submitted,

ALBERT C. PARKER, Head of Science Department.

ENGLISH DEPARTMENT

I hereby submit the following report wherein I have endeavored to set forth the aims which I am striving to attain in my teaching of English at Norway High School.

Today the high school is no longer regarded as merely a fitting-school for those students who are to attend college. It is now a recognized fact that only a very small percentage of the graduates of our high schools ever go to higher institutions of learning. Thus it is the function of the so-called preparatory school to fit the boy or girl not only for college but also for "life."

To do this, the work in English must be definitely systematized and a slightly different course offered to the student who plans to go to college than to the one who plans to go into business soon after leaving high school.

When I undertook my duties here, I found that such differentiation had already been made under the efficient direction of Miss Florence Rideout. Each of the two upper classes had been divided; the students of the "A" division taking the college preparatory work, while those of the "B" division take work better adapted to helping them in a business career.

In general, I believe that the aim of every high-school teacher of English should be two-fold:

First, to give the pupils the best possible command of the art of communication in speaking and in writing, and

Second, to form in them a taste for good reading, to teach them how to find the books that are best worth while, and to teach them to read thoughtfully and with appreciation.

These two aims are fundamental and should be kept in mind throughout the whole four years' course.

The first aim implies:

(a) Ability to read aloud in such a way as to convey to the hearers the writer's thought and spirit and to interest them in the matter presented.

(b) Ability to join in an informal discussion, contributing one's share of information or opinion, without wandering from the point, and without discourtesy to others.

(c) Ability to collect and organize material for oral discourse, and then to stand on one's feet and deliver it in a clear, forcible, and convincing manner.

(d) Ability to address an audience or to conduct a public meeting with proper dignity and formality, but without stiffness or embarrassment.

(e) Ability to write a courteous letter according to the forms in general use and of the degree of formality or informality appropriate to the occasion.

(f) Ability to compose on the first draft a clear and readable paragraph, or series of paragraphs, on familiar subject matter, with due observance of unity and order and with some specific detail.

(g) Ability to analyze and present in outline form the gist of a lecture or piece of literature and to write an expansion of such an outline.

(h) Ability, with due time for study and preparation, to plan and work out a clear, well-ordered, and interesting report of some length upon one's special interests—literary, scientific, commercial, or what not.

(i) Ability to write a short story, or other piece of imaginative composition, with some degree of vigor and personality of style and in proper form to be submitted for publication, and to arrange suitable stories in proper form for dramatic presentation.

Of course all written work demands correctness as to formal details—a firm and legible handwriting, correctness of spelling, grammar, and idiom, and observance of the ordinary rules for capitals and marks of punctuation; the writer should make an effort to gain an enlarged vocabulary, a concise and vigorous style, and firmness and flexibility in constructing sentences and paragraphs.

The second aim implies:

(a) Ability to find pleasure in reading books by the better authors, both standard and contemporary, with an increasing knowledge of such books and increasing ability to distinguish what is really good from what is trivial and weak.

(b) A knowledge of a few of the greatest authors, their lives, their chief works, and the reasons for their importance in their own age and ours.

(c) Understanding of the leading features in structure and style of the main literary types, such as novels, dramas, essays, lyric poems.

(d) Skill in the following three kinds of reading and knowledge of when to use each.

(1) Cursory reading, to cover a great deal of ground, getting quickly at essentials.

(2) Careful reading, to master the book, with exact understanding of its meaning and implications.

(3) Consultation, to trace quickly and accurately a particular fact by means of indexes, guides, and reference books.

(e) The habit of weighing, line by line, passages of especial significance, while reading other parts of the book but once.

(f) The power to enter imaginatively into the thought of an author, interpreting his meaning in the light of one's own experience, and to show, perhaps by selecting passages and reading them aloud, that the book is a source of intellectual enjoyment.

In order to help the pupil form a taste for good reading, lists of recommended books are prepared for each class, and each pupil is required to read one book each term and to write a formal review of this book. Thus the pupil's outside reading is, to a considerable extent, under direction.

According to the report of the National Committee for the Reorganization of English in Secondary Schools, the kinds of skill enumerated above should be taught for three fundamental reasons.

1. Cultural. To open to the pupil new and higher forms of pleasure.

2. Vocational. To fit the student for the highest success in his chosen calling.

3. Social and ethical. To present to the student noble ideals, to aid in the formation of his character, and to make him more efficient and actively interested in his relations with and service to others in the community and in the Nation.

With fundamental aims which are so well worth while, it seems to me that the modern teacher of English should find continual inspiration in his work. He can cheer himself with the certain knowledge that his work, if well done, must of necessity add materially to the success and happiness of all of his charges, and such knowledge brings the highest kind of pleasure to the worker.

I can truthfully say that I have never been in a community where I have so thoroughly enjoyed my work as I have here at Norway. I have found my assistant, Mrs. Pratt, ever ready and willing to help in every possible way, and the work with her has been decidedly pleasant. Likewise, Miss Knight, by having her pupils type-write stories and other material which I have wished to use for exhibition purposes, has been of great assistance to me. The students have been courteous and thoughtful and, for the most part, industrious, and it has been a pleasure to know them and to work with them.

Respectfully submitted,

MARGUERITE E. LOUGEE, Instructor in English.

LATIN AND HISTORY DEPARTMENTS

In compliance with your request, I am submitting a brief *rèsumè* of my work as teacher of Latin and History in Norway High School.

The total enrollment of students in the Latin department is forty-seven. As the various classes are fulfilling the regular college requirements, I consider a detailed account of this part of the work to be unnecessary, and shall confine myself to an enumeration of the variations from the usual mode of procedure.

The use of perception cards, vocabulary contests, and Latin conversation are prominent among the devices employed for supplementing the usual classroom work. The greater part of the work done in excess of the actual requirements, however, is carried on outside of the recitation periods in connection with the Latin Club.

The Latin Club was founded at the beginning of the current school year. Its object is to stimulate a deeper interest in the classics and to encourage individual study along those lines so that a better knowledge of Latin may be secured. Meetings are held once a month and

appropriate programs presented. At one of the regular meetings, Fred A. Knapp, Professor of Latin at Bates College, gave a very interesting and helpful talk on the "Value of the Classics."

In my history classes, I have been trying out a method recommended by Henry Johnson, Professor of History at Columbia University. The American History class is using Muzzey's American History and Botsford's History of the Ancient World is the text-book employed in the freshman class. Each of the classes is required to keep a note-book containing a record of the special reports prepared from outside reading, and in each class one period per week is devoted to the discussion of current history. At such times, the students deliver from the floor, before the class, a two to five-minute speech on some topic of current interest.

In addition to my prescribed duties as teacher of Latin and History, I have been endeavoring to offer a limited course in argumentation. Norway High School has again entered the Bates Interscholastic Debating League and has been placed in a triangle with Leavitt Institute and Deering High School. In preparation for the coming struggle with these schools, the Norway students electing the course in debating have been divided into two classes, meeting for one recitation period a week, respectively. Owing to the almost total absence of text-books, the instruction offered has, of necessity, been practically confined to the lecture method. Several practice debates have been held on varied subjects and all the debaters are now busy on the question of Compulsory Industrial Insurance submitted by the Bates Interscholastic League. A contest before the whole school will be held at a later date for the purpose of selecting the students to represent Norway in the debates against Deering and Leavitt.

Although any account of the work done by the classes in Latin, History and Argumentation would necessarily be very incomplete, perhaps the foregoing outline will be sufficient to indicate the general nature of the courses. The work done by the various classes has, on the whole, been very satisfactory so that work with them has been a pleasure.

Respectfully submitted,

F. MARION LOUGEE.

REPORT OF THE COMMERCIAL DEPARTMENT

To satisfactorily establish a new department in a well-organized high school without altering too greatly its curriculum is a slow and difficult process. During the past two years the schedule for the Commer-

cial course has been undergoing a careful and gradual revision. In its aim to offer subjects in their logical sequence and also when they will afford the best training for the student, without crowding out other subjects equally valuable to the commercial student, the following arrangement should prove highly satisfactory.

1st year—Commercial Arithmetic (required of all who take book-keeping).

2d year—Bookkeeping, Commercial Law, first half of year (required of all students). Civil Government, last half of year. Shorthand, last half of year.

3d year—Shorthand. Typewriting (required of all who take Shorthand).

4th year—Shorthand. Typewriting. Advanced Bookkeeping.

By commencing the study of Bookkeeping in the second year in place of the first year, as formerly, the pupil conserves much valuable time, energy, and material. His training in Business Arithmetic helps him to compute with reasonable speed and accuracy, bills, interests and discounts. His training in English prepares him to express his thoughts more clearly and concisely in recording transactions and preparing business forms.

Commercial Law, required of all students, furnishes a study of the laws applicable to the very transactions he is making each day, and later serves as a basis for the legal work performed in the shorthand course.

Pupils beginning the study of Shorthand in the last half of the second year are able to obtain a speed sufficient to enable them to occupy positions during the summer of the third year. During the last year they will have time to take and transcribe such a variety of matter as to enable them to fill satisfactorily almost any position.

Realizing the value of accuracy and speed to the typist, it has seemed best to allow each student who takes shorthand two typewriting periods per day. This amount of time counts as one subject. Other students may have one period in typewriting, in special cases two, when they are earning a sufficiently high mark in their other work to make this advisable.

Thus far, by means of a skillfully arranged schedule, which utilizes the machines during every period of the day, it has been possible to accommodate nearly all who desired to learn typewriting. The six machines with the necessary chairs make the 5 1-2 ft. by 9 1-2 ft. typewriting room so crowded that the teacher, small though she be,

can scarcely squeeze between the chairs after disturbing all who are typewriting. Next year, at the lowest estimate, seven more pupils than this year must be provided for. How can we accommodate them without lowering the efficiency of this important part of the Commercial Course?

This room should be large enough to allow space for a teacher's desk, a sufficient number of typewriter stands, and chairs of the correct height. It should also have space for a cabinet for supplies, the filing cabinet, and whatever else might be added to improve the course, as, a machine for copying letters, an adding machine, a dictograph, etc.

To secure the best work the room should always be under the supervision of an instructor, and students not left to solve their own difficulties five periods out of the eight, as now.

In order to receive credit all work must be neatly and carefully done. Special stress is placed on punctuation, spelling, and arrangement. The constant drill in writing transcripts of dictated matter of various kinds, is supplemented by the demand of the school and its superintendent. Writing business letters, arranging programmes, compiling the school census, making out tuition bills, drawing up basket-ball contracts, and copying essays, stories, plays, etc., furnish excellent and profitable practice.

Advanced Bookkeeping, in the fourth year, provides a short review on the work of the second year, and gives the pupil ample practice in handling the more complicated vouchers and special column books so much used by all large business houses. Placing the advanced work in this year furnishes an excellent opportunity to correlate Bookkeeping, Shorthand and Typewriting, and graduate the pupil at his highest efficiency.

I feel that in spite of our much-crowded quarters the Commercial Department is equipping our boys and girls with a practical-business training, which, when combined with a sincere determination to succeed, is sufficient to give them a start in any position.

In closing I wish to thank the Business Men of Norway who have so loyally supported this department by employing our students and graduates to fill vacancies which occur in their offices. Any suggestions for the betterment of the course will be gladly received.

Respectfully submitted,

EDITH M. KNIGHT.

Head of the Commercial Department.

ASSISTANT MATHEMATICS

My work as assistant in the Department of Mathematics began in September, 1917. Since that time I have had charge of one division in Algebra, which has made satisfactory progress.

In Commercial Arithmetic, which has been made a required subject for all who intend to take the Commercial Course, a review is made of the entire text. Especial emphasis is laid upon business methods which will be of practical value later. Many students not taking the Commercial course have availed themselves of the opportunity to review the subject.

Respectfully submitted,

MARY F. DRESSER.

TEACHERS' COURSE

My work as assistant in the English Department of our High School began with the Winter term of 1917. The subjects assigned me were English History and the Teachers' Training Class. Also, I took a part of English Composition work to correct, and acted as substitute in Miss Rideout's absence. My duties, in assisting Miss Lougee have been very much the same.

The English History Class is making excellent progress and the students are able and willing. The pleasing story-form of the text is a great improvement over that formerly used, and emphasizes those events which affect American History.

The Teachers' Training Class, composed of senior girls, devoted the Winter term to a study of School Management and a review of elementary subjects. They all passed the State examination in February, and are now teaching in the rural schools with good success. During the Spring term each of the girls had over two weeks' actual experience in managing a rural school, and several days' work in the village grades. The fall term opened with a new class, all in earnest and anxious to begin the review and practise work. The plan of dividing this course into junior and senior divisions seems almost imperative, and would give the girls a much better fitting in every way.

The attitude of the students is friendly and full of enthusiasm, and the tone of the school is without question the best since I have known it.

Respectfully submitted,

JANETTE L. PRATT.

PLANS AND RECOMMENDATIONS

In addition to the present force the Principal recommends such additional help as the Superintendent can provide for financially.

We should continue the policy of getting all of our boys and girls to high school, with the idea that the school belongs, not to a few, but to the children of every citizen of the town. That accomplished, we should do our best to keep them there by giving to each one the work for which he is best fitted.

This can only be done by constantly studying the needs of the individuals and by adapting our system to those needs, so far as we are able.

We should make a constant effort to keep our buildings and grounds neat, attractive, and safe.

A system of room telephones (which could be installed by our science students) would be of great help in the management of the school.

The dressing rooms are wholly inadequate for the number of pupils now in school. More and better accommodations should be provided at once.

In conclusion I earnestly invite all parents and citizens to visit the school, to see for themselves the changes which have taken place during the last few years, and to observe at first hand the work which we are trying to accomplish.

I wish, also, to again acknowledge the hearty support and co-operation of pupils, teachers, school officials and citizens.

Respectfully submitted,

PERCIVAL E. HATHAWAY, Principal.

Terms: W-Winter; S-Spring; F-Fall

SCHOOL CALENDAR

The fall term at Norway High School begins on the second Monday in September for a fourteen week term. The winter term begins on the first Monday in January for a twelve week term. The spring term begins, after a two week recess, for a ten week term. The common schools begin one week after the High School in the fall and close one week earlier in the spring. Otherwise the year is the same as for the High School. This gives a school year of 36 weeks for the High School and 34 weeks for the Common Schools.

TUITION PUPILS IN COMMON SCHOOLS

Doris E. Cummings, eighth grade, Oxford.

Irwin Cummings, sixth grade, Oxford.

Bernice Cummings, fourth grade, Oxford.

Margaret Cummings, first grade, Oxford.

Samuel Damon, seventh grade, Holt school, Waterford.

Julia Howe, fifth grade, Holt school, Waterford.

High school tuition is \$12.00 per term or \$36 per year.

Common school tuition is \$5.00 per term or \$15.00 per year.

1917 DON C. SEITZ PRIZE

The Don C. Seitz Scholarship prize of \$25.00 in gold awarded each year to the pupil of the graduating class doing the most meritorious work throughout the High School course was awarded to Katherine H. Jones.

This prize has greatly assisted in elevating the scholastic standard of the school. It stimulates friendly competition and serves to raise the whole tone of the high school work.

It is made possible each year through the benevolence of Mr. Don C. Seitz, a former citizen of Norway and now Managing Editor of the New York World. Mr. Seitz is a benefactor of whom the town may well be proud. It is hoped that he may be with us some year to present this prize at graduation.

Report of the Superintending School Committee

Norway, Maine, Jan. 31st, 1918.

The superintending school committee of the town of Norway, composed of Wm. F. Jones, member for one year, Dr. L. Hall Trufant, member for two years, and Hugh Pendexter, member for three years, met and organized on March 12, 1917. Mr. Wm. F. Jones was elected chairman of the board for the year.

On March 13, 1917, the joint committee of the two towns of Waterford and Norway met at East Waterford for organization. Mr. Wm. F. Jones was elected chairman and Dr. L. Hall Trufant, as secretary.

The following accounts show the appropriations of money for school purposes:

COMMON SCHOOL ACCOUNT

DR.

To Balance 1916 appropriation.....	\$ 636 83
Appropriation, voted March 5, 1917.....	3,600 00
Received from State Mill tax.....	2,700 57
Received from State Common School fund	2,612 04
Received from tuition.....	85 00*
	<hr/>
Total resources.....	\$9,634 44

*Tuition due on this account \$35.00.

CR.

By Teachers' wages.....	\$6,374 50
Transportation	1,436 25
Janitor services.....	653 00
Fuel	928 57
	<hr/>
	\$9,392 32
Unexpended balance.....	242 12
	<hr/>
	\$9,634 44

The unit costs for this department for the ensuing year will be practically as follows, as nearly as can be estimated:

Teaching 1918-1919.....	\$6,307 00
Transportation	1,700 00
Janitor service.....	730 00
Fuel	952 00

Estimated cost for next year.....\$9,689 00

On recommending the amount to be raised for the next year for this department we have based our decision on the following figures:

1917 balance.....	\$ 242 12
Estimated return from state.....	5,400 00
Estimated tuition.....	50 00

	\$5,692 12	
Town should raise 1918.....	4,300 00*	
		\$9,992 12

*If we raise this amount we will get a return from the State Equalization Fund, even \$100, less would get no return from this fund.

TEXT BOOK ACCOUNT

DR.

To Balance 1916 appropriations.....	\$ 5 24
1917 appropriation.....	700 00
Refund	12 00

Total resources.....\$717 24

CR.

By Amount expended for texts.....	\$713 08
Unexpended balance.....	4 16

\$717 24

Although there are larger demands upon this account than in previous years we are asking for no more than in previous years.

We recommend the raising of \$700.00.

REPAIRS ACCOUNT

DR.

To Balance 1916.....	\$ 76 82	
1917 appropriation.....	500 00	
Refund	20 00	
Total resources.....	\$596 82	
Overdraft	85 46	
		\$682 28

CR.

By Amount expended to date.....\$682 28

We find it necessary to shingle the Academy building during the ensuing year. As a means of fire protection and durability we have deemed it wise to recommend the raising of sufficient funds to purchase the Johns-Manville Asbestos Shingles.

We base our recommendation for this account on the following figures:

Shingling material will cost.....	\$673 75	
Repairs on interior Academy building.....	100 00	
Repairs at Crockett Ridge school house.....	100 00	
Repairs Norway Center Chemical closets.....	150 00	
Rural school stove jackets and intakes.....	100 00	
Floor, ceiling and boards at Sodom.....	150 00	
Painting Upper Primary, Center and at the Academy	150 00	
Total	\$1,423 75	

We have not included in the above the amount for labor of shingling the Academy building. We recommend the raising of \$2,000 for this account.

Balance unexpended.....	3 73	
		<u>\$754 77</u>

We recommend the raising of \$750.00 to support of the above department for the ensuing year.

INSURANCE, APPARATUS, APPLIANCES, ETC.

DR.

To Balance 1916.....	\$ 8 37	
1917 appropriation.....	900 00	
Refunds	34 15	
		<u>\$942 52</u>
Available		
1918 overdraft.....	5 75	
		<u>\$948 27</u>

CR.

By general supplies.....	\$948 27
--------------------------	----------

In recommending the amount to be raised for this account for the following year we have compiled the following figures based on 1917 expenditure as the known or prospective amounts which should be paid from this account during the ensuing year:

Norway Water Co.....	\$ 90 75
F. W. Sanborn, printing and paper.....	76 50
Typewriter ribbons.....	15 00
Paper for Common schools.....	150 00
Pencils, erasers and general supplies.....	150 00
Insurance	125 25
Blaugas for laboratory burners.....	26 00
Chemical and physical apparatus.....	100 00
Engrossing diplomas.....	8 00
Brooms, etc., for schools.....	30 00
Express, freight and postage.....	25 00
Loring Short & Harmon, register sheets, cards, etc.,	10 00

Floor oil.....	32 00	
Electric lights, High school.....	20 00	
Flags, globes and curtains.....	50 00	
		<hr/>
		\$908 40

We recommend the raising of \$900 for the above account.

FREE HIGH SCHOOL ACCOUNT

DR.

To 1917 appropriation.....	\$3,500 00
Amount received from state.....	500 00
Amount received for tuition.....	489 00

Total resources available for the year

1917-18	\$4,489 00	
To 1918 overdraft.....	267 13*	
		<hr/>
		\$4,756 13

CR.

By amount expended to date.....\$4,756 13

*This account would show a balance of \$68.87 if all the tuition which is due the town were paid in. Many towns do not close their books until about Feb. 15, so it is likely that the following amounts will be received before March 1st.

The following amounts are now due from:

Stoneham	\$216 00	
Otisfield	36 00	
Waterford	24 00	
Greenwood	24 00	
Harrison	12 00	
Bethel	12 00	
Oxford	12 00	
		<hr/>
Amount due.....	\$336 00	
Already received.....	489 00	
		<hr/>
Total tuition for year.....	\$825 00	

To summarize, our recommendations for the several school accounts for the year 1917-1918 are as follows:

For Common Schools.....	\$4,300 00
Free text books.....	700 00
Repairs	2,000 00
Insurance, apparatus, etc.....	900 00
Free High school.....	3,700 00
Music and drawing.....	750 00
Office of Superintendent.....	75 00

Respectfully submitted,

WILLIAM F. JONES, Chairman,
L. HALL TRUFANT,
HUGH PENDEXTER,

Superintending School Committee.

Norway, Maine, Jan. 31, 1918.

Report of the Board of Health

TO THE SELECTMEN OF NORWAY:

Gentlemen:—The Local Board of Health submits the following report:

During the year 1917 we had sporadic cases of measles, mumps, whooping cough and scarlet fever. A few cases of tuberculosis were reported. No unusual epidemic of any contagious disease during the year, until early in December, when small pox of a mild type was discovered in town. Between December 10th and date of writing this report, twenty cases of this disease have been reported. We are of the opinion that there have been several more cases, so slight as to pass unrecognized, no physician being called, and the afflicted party attending to his or her usual vocation. This type of case causes nearly all the trouble, as the disease is innocently spread by the person who has it, he being unaware that he is harboring a disease that may become dangerous at any time. The town is fortunate indeed that the present epidemic is so mild.

Respectfully submitted

H. L. BARTLETT, M. D., Sec. Local Board of Health.

Report of the Building Inspector

TO THE SELECTMEN OF THE TOWN OF NORWAY:

I submit my report as building inspector for the town of Norway ending Jan. 1, 1918:

There has been quite a number of new buildings built in the village this year and a great number of repairs which has been done very satisfactory as for fire and safety.

Respectfully submitted,

H. E. MIXER, Building Inspector.

Balance against farm for the year.....		\$588 38

We engaged Mr. George A. Ayer and wife to take charge of the farm for the year, Mr. Ayer has been a hard working man and has looked after the farm work to our entire satisfaction, Mrs. Ayer as matron has looked after the work inside and when on January 10th this year the State Board of Charities sent a member of their board to inspect the farm and they reported finding it neat and clean throughout, and in fact the best they had visited in the State, we felt that it was not only a credit to the town but to Mr. and Mrs. Ayer. The farm would have made a better showing the past year had it not been for the fact we were obliged to buy so many new farming tools, the sulky plow, horse rake, and mowing machine were nearly worthless and had to be replaced, and if they are taken care of as well in the future as they have been the past year will last a long time. Mr. Webber has had charge of the poultry and as in the past deserves credit, we feel that if he had a poultry house by itself he would make a still better showing and Mr. Ayer is going to get out lumber this winter to build a house twelve feet wide and sixty feet long and will be divided into four pens.

Below we give a verbatim report of the Inspector with the Recommendations and suggestions and conditions observed.

NORWAY TOWN FARM

(January 10, 1918.)

Superintendent and matron, Mr. and Mrs. George Ayer; experience, since April 1, 1917.

RECOMMENDATIONS AND SUGGESTIONS

As this is one of the better almshouses in the state it would be gratifying to see further improvements. Single white iron beds with springs and mattresses are recommended in the rooms regularly used.

CONDITIONS OBSERVED

Inmates have a sitting room and their food is cooked in the superintendent's kitchen.

Water: Gravity service from a spring. Fills a metal barrel in kitchen which is cleaned out periodically. Overflow goes to a barnyard, where stock is watered.

Drainage from kitchen sink to cesspool which was cleaned out in spring of 1917.

Toilets: Four earth closets, double boarded, but nevertheless cold.

Baths: Inmates bathe weekly in their bed rooms, except that the feeble minded man takes his bath in a tub in the cellar next to the furnace.

Food: An abundance of cooked food was found in the pantry. In the cellar are quantities of food supplies, pork, apples, potatoes and canned goods. The almshouse is 6 miles from the stores, but provisions are brought in good quantities. Eggs are put down for winter use. The inmates have just the same to eat as the officers. They had a roast pork dinner on the day of inspection.

Cleanliness: Every bed was clean and no vermin was found. The bedding is adequate. The inmates' dishes were clean and neatly arranged. The floors were well swept. The cleanliness and comfort in this almshouse is superior.

Labor of inmates: A lame male inmate takes full care of the 150 hens and the driving horse. The feeble minded man chores around. The feeble minded woman does all the washing, sets the inmates' table and washes their dishes. She is a good worker and owes the town nothing for her keep. The other woman inmate is nearly blind. She keeps her own room in good order. Discipline: As the inmates are industrious, well fed and have comfortable beds, they are contented and the discipline is easy.

Sickness: None are sick. There are no hospital accommodations and they are far from a doctor. Farm: There are three horses, 14 cows, 8 calves and 150 hens. There were raised 8 pigs, but 5 were sold, one has been killed and two remain in the pen. The stock seems to be well cared for and the barn and sheds were clean. A good supply of fire wood is on hand. The silo was partly filled this season. A splendid supply of beans is stored away. The cows are grained regularly and the cream is sold. The skim milk is warmed and given to the calves. The cows are turned out once a day for their drink of spring water in the yard. Ice: The men are busy at present in harvesting ice. It is a long haul as the almshouse sets very high. The road drifts in and has to be opened every day. There is a telephone in the house. Improvements: The inmates' sitting room, the kitchen and pantry and one bed room were done over in 1917.

Tramps: An attic room is called "the tramp room," but tramps do not apply for entertainment. A room with a barred door has been used sometime in the past for the insane.

Inmates: Four over 60, 2 men and 2 women. One lame, one nearly blind and two feeble minded.

INMATES AT THE TOWN FARM, JAN. 31, 1918

Dependent wives and mothers.....	299 91	
		<u>\$753 68</u>

We wish to say that the towns and cities who were owing us pauper bills have been very prompt in paying their bills. We sent the out of town bills Nov. 1st and with two exceptions they have all paid.

Chapter 276 "public laws of 1917," made it mandatory on every town to pay wives and mothers of soldiers who were in the U. S. service \$4.00 per week, and children under fifteen years of age \$1.50 per week and it also requires towns to raise money for this purpose. We have had to pay this from the contingent fund and up to Jan. 31st as shown in our report we have paid \$299.91, this amount will be reimbursed by the state.

In regard to Ross L. Bickford, we investigated the case and wrote to. We ascertained that the city of Lewiston were helping his family during 1916 and part of 1917, unbeknown to Mr. Bickford. We find however that he is on this town, but he is paying up the bill to us in regular payments.

Report of the Selectmen

Town orders have been drawn for the year ending Feb. 1st, 1918,

Norway, Maine, Jan. 31, 1918.

This certifies that we have this day examined the books and accounts of E. N. Swett, treasurer of said town and find the same correct and hereby approve of the same.

GEO F. HATHAWAY,
H. ARTHUR ROBBINS,
ALVIN BROWN,

Selectmen of Norway.

Music and Drawing Report.

This country's need is a greater merging of art in industry. Manufacturers of automobiles, cloth, and the commonplace things that daily surround us, the advertisements that are ever before us, are all calling for better designing. It is the children who are being educated in our schools who will be called upon to supply these. We are studying with that end in view.

Patriotism is a virtue that is particularly emphasized at present. Perhaps many of you noticed the posters on exhibit in one of the store windows during the Red Cross drive. They were the work of the seventh grade soliciting aid for the organization. Stenciling of home-used articles is always of interest and we hope to have some good results from our work in the upper grades. A contest in design proved to be a splendid incentive to good work between the seventh and eighth grades. A simple but effective method of cutting designs from paper, brought interesting results. The decree of several competent judges was in favor of the seventh grade. The stencils will be used for blackboard borders to make our rooms more attractive. The paper cutting design work has brought good results all through the grades. Letter cutting makes a splendid foundation for good printing later on. Costume designing and interior decorating have their place in the drawing course and are important phases of the work.

The music is going well this year. Original work is proving successful. The little folks are making their own little tunes and words and very soon will be making whole songs. It is surprising how tuneful some of them are. We are finding new uses for the victrola every day and feel that it is indispensable for rhythm work and singing. The children are learning songs that they will be glad to know and remember all their lives.

Respectfully submitted,

ELIZABETH McCREERY.

Warrant For Town Meeting

To F. W. Sanborn, a citizen of the town of Norway, in the County of Oxford and State of Maine, Greeting:

In the name of the State of Maine you are hereby required to notify and warn the inhabitants of said town of Norway qualified by law to vote in town affairs, to assemble at Norway Hall in said Norway on Monday, the fourth day of March next at ten o'clock in the forenoon to act on the following articles to wit:

Art. 1. To choose a moderator to preside at said meeting.

Art. 2. To choose a Town Clerk for the ensuing year.

Art. 3. To choose a board of Selectmen, Assessors, Overseers of the Poor, Town Treasurer, a member of the Board of Superintending School Committee for three years, two trustees of the Norway Public Library, a Tax Collector, and all other necessary town officers for the ensuing year.

Art. 4. To see if the town will vote to elect the Board of Selectmen, Assessors and Overseers of the Poor, one for three years, one for two years and one for one year, they to choose the Chairman as requested by the State Board of Assessors.

Art. 5. To see if the town will vote to abate the taxes assessed against the heirs of W. S. Pratt for one year, 1918.

Art. 6. To see if the town will vote to abate the taxes assessed against Albert F. Canwell for the year 1918.

Art. 7. To see if the town will vote to abate the taxes assessed the heirs of Leonard Flint for the year 1918.

Art. 8. To see if the town will vote to abate the taxes assessed against Hattie Small for the year 1918.

Art. 9. To see what per cent. the town will vote to pay for collecting taxes for the ensuing year.

Art. 10. To see what sum of money the town will grant and raise for the support of the poor for the ensuing year.

Art. 11. To see what sum of money the town will grant and raise the town officers' salaries for the ensuing year.

Art. 12. To see what sum of money the town will grant and raise for the repairs of highways and bridges for the ensuing year.

Art. 13. To see whether the town will vote to raise money, and what sum, for the maintenance of State and State aid highways during the ensuing year, within the limits of the town, under the provisions of sections 9 and 18 of chapter 130, of the public laws of 1913.

Art. 14. To see if the town will vote "yes" or "no" on the question of appropriating and raising money necessary to entitle the town to State aid, as provided in section 20 of chapter 130, of the public laws of 1913.

Art. 15. To see if the town will appropriate and raise the sum of (\$798.00) for the improvement of the section of State aid road as outlined in the report of the State Highway commission in addition to the amounts regularly raised for the care of ways, highways and bridges; the above amount being the maximum which the town is allowed to raise under the provisions of section 19, of chapter 130 of the public laws of 1913.

Art. 16. To see what sum of money the town will grant and raise to pay snow breaking bills for the winter of 1917 and 1918.

Art. 17. To see what sum of money the town will grant and raise to protect the town from moth pests.

Art. 18. To see what sum of money the town will grant and raise for rent of hall and other incidental expenses.

Art. 19. To see what sum of money the town will grant and raise to clear the highways of bushes.

Art. 20. To see if the town will vote to purchase the bonds required of the Treasurer and Collector for the ensuing year.

Art. 21. To see if the town will vote to authorize the Selectmen to pay a sum not exceeding one hundred dollars (\$100.00) to pay the office rent of the local Agricultural Demonstrator for the ensuing year, said sum to be paid out of the contingent fund from any unexpended balance thereof.

Art. 22. To see what sum of money the town will grant and raise for the support of common schools for the ensuing year.

Art. 23. To see what sum of money the town will grant and raise to be expended for free textbooks for the ensuing year.

Art. 24. To see what sum of money the town will grant and raise for the repairs on school buildings for the ensuing year.

Art. 25. To see what sum of money the town will grant and raise to be expended for insurance on school property and for apparatus and appliances for the ensuing year.

Art. 26. To see what sum of money the town will grant and raise for expense of an office for the superintendent of schools for the ensuing year.

Art. 27. To see what sum of money the town will grant and raise for support of a free high school for the ensuing year.

Art. 28. To see what sum of money the town will grant and raise for instruction of music and drawing in the Village, Lake, Center, Crockett Ridge schools for the ensuing year.

Art. 29. To see what sum of money the town will grant and raise for the support and maintenance of the Norway Public Library for the ensuing year.

Art. 30. To see what sum of money the town will grant and raise for Memorial Day observance, for the ensuing year, to be expended by Harry Rust Post, No. 54, G. A. R.

Art. 31. To see if the town will vote to expend ten per cent. of the amount raised for highways and bridges for the ensuing year on sidewalks.

Art. 32. To see if the town will vote to fix a date when all taxes for the year A. D. 1918 shall become due and payable to the Collector.

Art. 33. To see if the town will vote to charge interest and at what rate and at what time interest shall commence on taxes not paid.

Art. 34. To see if the town in the exercise of its option will vote to have one, two or three road commissioners.

Art. 35. To establish the price that the road commissioner or commissioners shall receive for services.

Art. 36. To see if the town will vote to recind the action taken on article 34 at the town meeting March 3, 1913, whereby the town granted and raised \$2,000.00 for the purchase of a stone crusher.

Art. 37. To see what disposition the town will vote to make of the \$2,000 rendered available by decision of vote on stone crusher.

Art. 38. To see if the town will vote to build a road on Cottage street and to see what sum of money the town will appropriate for this purpose.

Art. 39. To see if the town will grant and raise \$200.00 to reduce the grade of the French Hill at Swifts Corner, provided \$75.00 is otherwise contributed in money or labor.

Art. 40. To see if the town would be in favor of the new road to Crockett Ridge and Millettville provided it cost not more than five thousand dollars.

Art. 41. To see if the town will vote to authorize the Treasurer of the town to borrow during the current financial year, with the approval of the Selectmen, in anticipation of the revenue for said financial year and to be paid therefrom, such sums of money as may be necessary for the current expenses of the town, giving the note or notes of the Town therefor, payable within one year or sooner from date thereof.

Art. 42. To see what sum of money the town will grant and raise for interest charges for the ensuing year.

Art. 43. To see what method the town will take to care for the new concrete street.

The Selectmen give notice that they will be in session at the Selectmen's office in Norway for the purpose of receiving names and correcting the list of voters on Saturday, the second day of March A. D. 1918, at two o'clock in the afternoon.

Given under our hands this 18th day of February A. D. 1918.

GEO. F. HATHAWAY,
H. ARTHUR ROBBINS,
ALVIN BROWN,

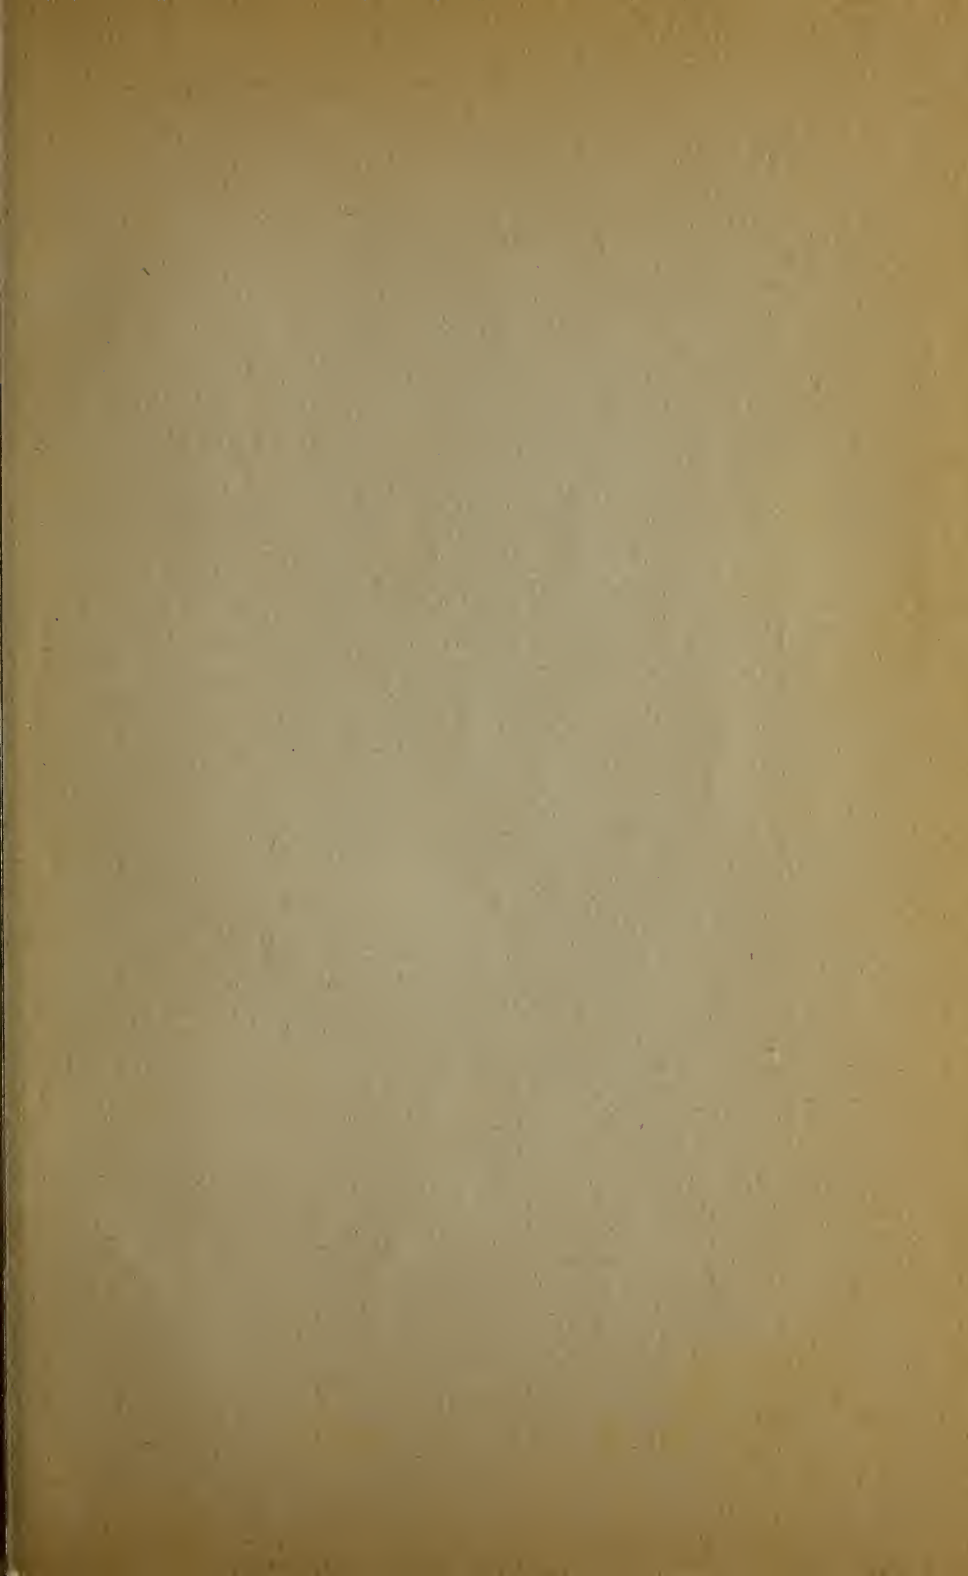

Selectmen of Norway, Me.

Light On

The Norway National Bank

Investigate this Bank as it stands to-day. Trace its history along the entire course from its beginning in 1872, just 46 years ago, and you will find that—

It has had a sound, steady and vigorous growth.

It has followed a consistent policy of conservative yet progressive banking.

Its spirit is in accord with the best spirit of today—co-operation and service.

By its policy and service it has made many friends and has prospered through their prosperity.

It has a personality which is cordial and friendly.

To this policy and service is due the remarkable growth of the Bank, which now ranks as the “Oldest and Strongest National Bank in Oxford County.”

You are urged to make a personal investigation of its facilities and service.
